Professional Bio

A skilled and dedicated Software Engineer with extensive experience in designing, developing, and maintaining robust systems and applications. Proficient in modern technologies, frameworks, and programming languages, with a strong focus on performance optimization and scalability. Adept at collaborating with cross-functional teams to deliver high-quality software solutions that meet business objectives. Proven track record of successfully implementing secure APIs, managing databases, and deploying scalable microservices.

Work Experience

Staxx Hub, Lagos
Software Engineer   **February 2023-present.**
Staxx Hub Limited is a Lagos-based technology solutions company specializing in website and application development. The company focuses on delivering tailored digital innovations to empower businesses
As a Software Engineer at Staxx Hub, I work closely with the development team and project managers to deliver scalable, robust solutions. I provided critical technical support to achieve project objectives and ensured the efficient management of backend and frontend systems. My contributions were aligned with company standards, significantly enhancing operational effectiveness

 I have achieved some key milestones working in this role which includes:

- Successfully integrated third-party APIs, improving data flow and expanding service capabilities by 40%.
- Implemented advanced security protocols and conducted regular audits, reducing security incidents by 35%
- Collaborated closely with cross-functional teams and mentored junior developers, enhancing team productivity and fostering a culture of continuous learning
- Created comprehensive technical documentation for backend and frontend systems, improving knowledge transfer and onboarding processes.
- Led the optimization of backend systems, resulting in a 30% increase in processing speed and a 20% reduction in server load.
- Architected and implemented scalable backend solutions, supporting a 50% growth in user base without compromising system stability or performance.

Technical Skills.

Programming Languages(Java, Python, Javascript/Node.js).
Frameworks and Libraries(Spring Boot, Django, React,Tailwind CSS, Hibernate(Java ORM)).
DataBases(MySQL, PostgreSQL, MongoDB).
API Development(RESTful APIs, API documentation tools like Swagger or Postman)
Version Control(Git/GitHub)
Docker tool.

Soft skills

Design thinking, Industrial design, Decision making, Creativity, Problem solving and Communication.

Projects

Seamoss MarketPlace

Contributed to the development and launch of an online marketplace focused on providing high-quality, nutrient-rich seamoss products. The platform offers various forms of seamoss, including gels, powders, and capsules, aimed at improving health and wellness. The project involved collaborating with a team to design a user-friendly interface, integrate secure payment systems, and optimize product catalog management, all while ensuring the platform's scalability and efficiency.

Partna Fractional real Estate

Contributed to the development of Partna Fractional Real Estate, enabling users to invest in and co-own real estate properties through fractional ownership. Played a key role in enhancing platform functionality and improving investment tracking systems.

Certification

Henley Business School   2024
Business Education & Entrepreneurial Development

Semicolon Africa
Diploma in Software Engineering   2025

University of Lagos

BSc Economics   2022
